Campomatic Australia

*The OFF ROAD Camper!*

# It's as easy as 1..2..3..

Setting up is easy with your Campomatic, simply swing the spare wheel carrier open, unclip the luggage rack and let the gas struts do all the work.

All canvas and mesh used in your Campomatic is of the highest quality and locally manufactured. As an option your Campomatic can be supplied with all 5 annex walls as well as a draft curtain.

A full stainless steel slide out kitchen is included in your Campomatic, this includes fully plumbed gas and water, a 12v pressure sensitive pump drawing from a stainless steel water tank, a 4 burner stove with grille, cutlery drawer, tea towel rail and generous preparation bench.

All of which is accessible even when the tent is closed.

An aerodynamic front wedge box houses a robust upright 65l fridge freezer to keep all the essentials chilled to perfection.

The interior of your Campomatic is fitted with an innersprung mattress, gooseneck reading lights and LED room lights as standard. Extra large windows and high roof keep the camper cool even in the harshest conditions.

Generous under bed storage is easily accessible via the gas strutted bed base. This storage area is also accessible through the rear access hatch even when the tent is closed. Side storage lockers make use of what would normally be wasted space.

Built tough for tough conditions, our own designed independent coil sprung suspension makes light work of the toughest outback tracks.

Why not take your "tinnie" with you. As an option your Campomatic can be fitted with a galvanized, gas strut assisted boat loader making loading and unloading your boat a breeze. A multi fit outboard motor hold is included as standard.
